- 1) Cut flextangle out.
- 2) Fold all dotted lines face to face (valley fold).
- 3) Fold *all* diagonal lines back to back (mountain fold).
- 4) Gently fold flextangle so the dots touch to make a tube shape, glue the tabs and press together until dry. Reinforce with sticky tape if needed.
- 5) Carefully turn flextangle into a circle by meeting the end tabs with the opposite end. Add glue to end tabs, slot them into the opposite end's hole and press until dry. Add sticky tape to reinforce join.
